### Sustainability of Businesses Amidst COVID-19 in India and Challenges Related to Data Security

The global outbreak of the COVID-19 has dealt serious blows to the different sectors of the economy. Businesses in different sectors are facing troubles and have been crippled by the pandemic. Digitization has become an absolute necessity and has quite efficiently kept the basic operations running. In this uncharted territory, employers are facing a serious concern when it comes to Data Security. With an increased concern and awareness about data privacy, employers are faced with numerous questions regarding their cyber preparedness. In, this video, our partner Neha Mathew, speaks about the sustainability of businesses and the regulations relevant to the digitization of business operations amidst the COVID-19 crisis.
